EXPERIENCE

South American Restaurants Corp.
Senior Buyer

Guaynabo, PR
November 2023 – July 2025

- Forecasted demand using historical, seasonal, and promotional sales while managing warehouse capacity to ensure consistent product supply for over 200 business locations across 5 quick service restaurant brands
- Opened and optimized supplier communication to reduce lead times by 20%, mitigate supply risks, and negotiate prices for internationally sourced products
- Worked with accounting and IT departments as the lead procurement rep. and data migration specialist for the implementation of a warehouse management system (WMS) handling over 8,000 stock keeping units (SKUs)
- Sourced and negotiated million-dollar production contracts to transition operation away from single-use plastics and comply with evolving government regulations
- Initiated inter-departmental meetings to review operational procedures and develop automated Excel, Python, PowerBI, and Sharepoint solutions to optimize labor resources by 20% and increase forecasting detail by refining monthly estimates to weekly granularity

Contract
Network Security & Data Migration Specialist

Hybrid from Guaynabo, PR
August 2022 – November 2023

- Migrated client's ERP including thousands of employees and hundreds of fleet vehicles to Oracle NetSuite
- Automated and optimized client's business processes within accounting, payroll, and HR departments
- Prepared and analyzed sensitive client data in response to a federal operational and accounting audit
- Advised and directed the installation of F5 network and data security devices capable of handling millions of concurrent connections
- Created tools using VBA and Python to download, evaluate, and configure network security device configurations through REST API increasing efficiency from multiple days to a single hour
- Served private security companies, state agencies, an international accounting firm, and national healthcare organizations

Oriental Bank
Data Analyst Intern

San Juan, PR
June 2022 – August 2022

- Designed and automated a financial tool in Power BI to analyze the performance of a multimillion-dollar investment portfolio

South American Restaurants Corp.
Data Analyst Intern

Guaynabo, PR
November 2021 – April 2022

- Collected and analyzed data to create a model utilizing Python and Power BI to predict restaurant sales based on geolocations and other variables
- Created automated financial statements and configured general ledger accounts during the migration of the company's enterprise resource management system (ERP) to Oracle
